

# Rumble in the Jungle!

## Year 5 Term 4

### What I should already know:

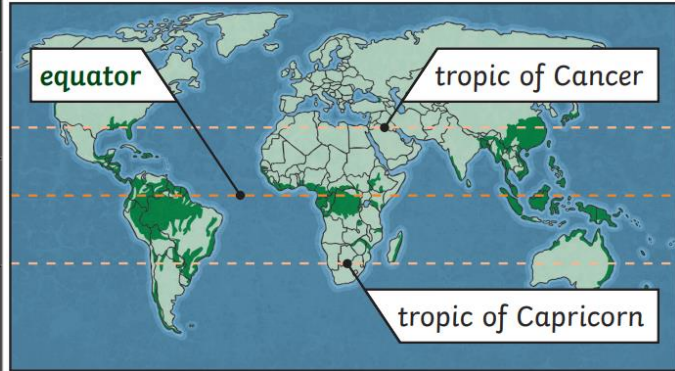

- How to locate the world's countries using an atlas, as well as the equator and tropics on a world map
- The difference between human and physical characteristics, and be able to describe key aspects, such as rivers
- How to describe climates and biomes across America
- That the Amazon is the world's largest rainforest and is located in South America

### What I will learn:

- To know how to use maps and atlases to locate countries and identify areas of the world containing rainforests
- To know the key aspects of a tropical climate and how it compares to the UK
- To know the features of the layers of a rainforest
- To know the key aspects of the water cycle (physical geography)
- To know the impact that humans are having on the rainforests

### Key Vocabulary

<b>climate</b>	The average <b>weather</b> conditions over a long period of time.
<b>deforestation</b>	The cutting down and clearing of forests.
<b>equator</b>	An imaginary circle running round the centre of the earth.
<b>humid</b>	Feeling very damp due to water vapour in the air.
<b>native tribes</b>	The original settlers of an area.
<b>species</b>	A group of similar animals or plants
<b>weather</b>	The specific condition on a given day.

### Layers of the Rainforest
