

Animals including humans

Science Term 2

What should I already know?

- To know that animals, including humans, need the right types and amount of nutrition.
- To understand animals, including humans, cannot make their own food and they get nutrition from what they eat.
- To be able to classify vertebrate animals into groups: fish, amphibians, reptiles, birds and mammals.

What am I going to learn? (Sticky knowledge)

- To understand how to interpret a variety of food chains.
- To know how to construct simple food chains.
- To understand the terms producers, consumers, predators and prey.
- To know the simple functions of different types of teeth in humans.
- To know that the teeth of carnivores and herbivores are different.
- To know the simple functions of the digestive system in humans.
- To know the main part of the human digestive system.

food chain

Vocabulary

	producer
	consumer
